Professional Summary

Master of Information Technology student at the University of Auckland with a strong technical foundation in software engineering, cloud technologies, and AI-assisted development. Experienced in building full-stack applications with C#, ASP.NET Core, React, Node.js, NestJS, and MongoDB; designing RESTful APIs; and collaborating in Agile teams.

Technical Skills

Languages: C#, TypeScript, JavaScript, Java, Python, SQL, C++
Frameworks: ASP.NET Core, .NET, React, NestJS, Node.js, Express
Cloud & DevOps: Microsoft Azure, AWS, Docker, GitHub Actions
Databases: PostgreSQL, SQL Server, MongoDB, MySQL, SQLite
Developer Tools: Git, GitHub, VS Code, Cursor, GitHub Copilot
Software Engineering: RESTful APIs, Object-Oriented Programming (OOP), Agile, MVC, Software Testing, Debugging

Experience

Technical Team Intern

Alpha Tech & Media

Mar 2026 – Present

Auckland, New Zealand

- Developed and tested full-stack features using C#, ASP.NET Core, React, Node.js, Express and MongoDB.
- Collaborated in Agile, Git-based workflows to debug, test and implement features across frontend and backend systems.

Business Operations Intern

Honglian 95 (CITIC Group)

Jul 2025 – Sep 2025

Beijing, China

- Supported digital service projects and internal business platforms.
- Assisted with data processing, reporting and workflow optimisation.
- Participated in customer service system operations.

Finance Intern

Baotou Iron & Steel Group

Jul 2024 – Aug 2024

Baotou, China

- Supported financial reporting, data analysis, accounting records and internal documentation.

Projects

FocusForge | React, TypeScript, NestJS, MongoDB, Docker, AWS EC2, Vercel

Public repository: github.com/Dingchen-Yuan/focusforge-omniport

- Contributed to a full-stack cognitive training application in an Agile team using React, NestJS, MongoDB, Docker and AWS EC2.
- Redesigned the login and landing interfaces and improved mobile authentication navigation for smaller viewports.
- Added right/wrong game feedback sounds and configured Vite LAN hosting for on-device testing and responsive UI validation.

UOA Village | SvelteKit, Express, SQLite, Java Swing

Public repository: github.com/Dingchen-Yuan/uoa-village-witty-wolves

- Developed the Java Swing administrator client with user management, platform statistics and dashboard functionality.
- Implemented login, registration, navigation and profile features for a team-built university community platform.
- Delivered friend/chat flows, password recovery and a responsive UoA-inspired visual theme across the web interface.

Grok Career Coach (In Progress) | ASP.NET Core, PostgreSQL, Redis, Docker, Azure

Public repository: github.com/Dingchen-Yuan/grok-career-coach

- Developing an AI-assisted career coaching platform using ASP.NET Core and PostgreSQL.
- Designing scalable RESTful APIs and integrating Redis caching to improve application performance.
- Deploying containerised services with Docker and Microsoft Azure following cloud-native development practices.

AWS Portfolio Ops (In Progress) | NestJS, PostgreSQL, AWS S3, Terraform, GitHub Actions

Public repository: github.com/Dingchen-Yuan/aws-portfolio-ops

- Building an automated portfolio deployment platform using Infrastructure as Code and CI/CD pipelines.
- Managing AWS resources with Terraform and automating deployments using GitHub Actions.
- Hosting portfolio assets on AWS S3 while applying modern DevOps workflows.

Education

University of Auckland

Master of Information Technology

Auckland, New Zealand

Expected 2027

Hainan University

Bachelor of International Economics and Trade GPA: 3.31/4.0

Haikou, China

2021 – 2025

Professional Certifications

Microsoft Certified: Azure AI Cloud Developer Associate (AI-200) — In Progress, Expected 2026

Microsoft Certified: SQL AI Developer Associate (DP-800) — In Progress, Expected 2026

AWS Certified Developer – Associate — In Progress, Expected 2026
